

User Manual for Ray-Ban Meta Smart Glasses (Ray-Ban × Meta)

1. Package Contents

- Ray-Ban Meta Smart Glasses
- Charging Case
- USB-C Charging Cable
- Microfiber Cleaning Cloth
- Quick Start Guide

2. Charging

1. Place the glasses in the charging case.
2. Connect the USB-C cable to the power supply.
3. The battery will fully charge in about one hour and provide approximately 4 hours of normal use

3. Power On, Off and Pairing Mode

- Power On: There is a slide switch on the left inner leg - slide towards the lens, the LED will start to flash white, then stay green when the glasses are ready
- Power Off: Slide the switch all the way to the left - the LED will start to flash red
- Pairing: After powering on, place the glasses in the case - the LED will start to flash and the glasses will enter pairing mode (on some models, hold the back button of the case for 5 seconds)

4. Pairing with a smartphone and the Meta app (Meta AI / Meta View)

- Download the Meta AI app (newer version) or Meta View (older branding) from the App Store or Google Play
- Create or log in to your Meta (Facebook) account.
- In the app, select “Add device” – follow the instructions to complete pairing. You may need to enable Bluetooth, location services and notifications

5. Basic controls

a) Capture button

- Photo: Press once. LED flashes white, sound plays
- Video: Hold the button – video is recorded (default 30 seconds, can be set up to 3 minutes in the app)

b) Voice control

- Activate the Voice control option in the app with the switch
- Say “Hey Meta, take a photo” or “Hey Meta, take a video”
- The LED will then flash, alerting others that you are recording

c) LED indicators

- Power off: flashes white, then green – ready to use
- Low battery: orange 4x
- Near temperature limits / auto power off: red 4x
- Photo: LED and capture LED flash white
- Video: both LEDs remain white
- Error: solid orange for approx. 3 seconds
- Incoming call: LED flashes white
- Call: pulsating white

6. Special features

- Live streaming to Instagram or Facebook (newer version)
- Built-in speakers for music, podcasts or calls
- Voice assistant (Meta AI) – music control, calls, translations, “what am I seeing around” questions (feature gradually expanded)

7. Media sharing and management

- Photos and videos are stored in the app. From the app, you can share on Instagram, Messenger, WhatsApp or export to your phone’s gallery

8. Safety and user recommendations

- Do not wear glasses while driving or when your full attention is needed
- Be mindful of privacy – LED notification helps, but no one may know that you are recording
- Battery can drain quickly in very cold weather (winter activities, weekend rides) – expect limited battery life

9. Maintenance and Updates

- Clean gently with a microfiber cloth (glasses and touch pads)
- Store in the charging case when not in use
- Do not compromise the battery by exposing it to extreme temperatures or sunlight
- Check regularly (via the app) for firmware updates

10. Troubleshooting

Problem	Possible Solution
Pairing does not work	Turn on Bluetooth, delete old pairings, restart the app/phone.
No sound	Check the connection, volume level, cleanliness of the membranes.
The call is interrupted	Check that the microphones are clean and the glasses are within Bluetooth range.
The LED works, but no image	Clean the lens, restart the glasses and sync again.
Short battery life	Reduce the use of AI features, keep the glasses in the charging case.
Factory reset	(if available) - according to the manufacturer's instructions in the app.
